

The image shows a Windows desktop environment with two main applications open: Visual Studio Code and a web browser.

Visual Studio Code:

- The editor window shows a file named `index.py` with the following code:

```
10 app.run(debug=True)
```
- The bottom panel shows the **TERMINAL** tab with the following output:

```
C:\Users\User>d:
D:\>set FLASK_APP=index
D:\>flask run
 * Serving Flask app 'index'
 * Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
 * Running on http://127.0.0.1:5000
Press CTRL+C to quit
```

Web Browser:

- The browser window shows the address `127.0.0.1:5000`.
- The page content displays `Hello World!`

The Windows taskbar at the bottom shows the Start button, search icon, and several pinned applications including File Explorer, Edge, and VS Code. The system tray on the right indicates the language is **ENG IN**, and the date/time is **11:24 17-10-2022**.
