S

The screenshot displays the Docker Playground interface. On the left, there's a sidebar with a clock showing 04:23:29, a 'CLOSE SESSION' button, and a list of instances including '192.168.0.13 node1'. The main area shows details for an instance named 'cdm7kme0_cdm7i7u3tccg00elg0m0' with IP 192.168.0.13 and port 5000. Below this, the terminal output is visible, showing a Docker error message and a successful run of a Flask application.

```
docker: Error response from daemon: pull access denied for 5000, repository does not exist or may require 'docker login': denied: requested access to the resource is denied.
See 'docker run --help'.
